'Prayer' group protests Planned Parenthood Student

By Nicole Belt
Daily Staff Writer

For the past year Planned Parenthood in San Luis Obispo has been feeling the pressure of a peaceful prayer presence twice a week, which has led the clinic to plan its first training session for volunteer escorts.

The Catholic group, Helpers of God's Precious Infants, has been gathering in front of the Pismo Street clinic to promote its belief that abortions will emotionally, physically and mentally scar prospective mothers as well as cause the demise of the traditional family structure.

Anna Lee Welsh, one of the "prayers," said group members don't use violence in showing their disapproval of the clinic. They distribute pamphlets to patients and stand outside the clinic praying for God to spare the lives of the unborn children and to give mercy to the mothers having abortions. They don't trespass or try to prevent people from entering the clinic.

"We are there to be peaceful and prayerful. True pro-lifers don't use violence," Welsh said.

Lisa Story, director of Planned Parenthood, had a different opinion of the group's activities. She said that they walk the block in front of the clinic and verbally harass customers by praying, singing loudly and telling customers that the clinic will hurt and abuse them.

"Sometimes they pose as employees of the clinic and act like they have something legiti-

Photo by Jason Kaltenbach

The Helpers of God's Precious Infants gather to pray in front of Planned Parenthood's Pismo Street clinic.

mate to tell them. Other times they will lean in to get cars to stop and roll down their windows, and they will throw literature at them," Story said.

Many customers have told employees they have felt harassed by the demonstrators, Story said, and employees often have to escort customers to their cars or let the really concerned customers exit through the back door to avoid any contact with the "prayers."

This is why Planned Parenthood will today hold its first community service training

class for volunteer escorts.

Story said that there have been many people interested in volunteering as patient escorts since she started asking around.

The Cal Poly National Organization of Women (NOW) chapter is getting involved by recruiting volunteers who have the time and interest for the training.

Jordan Schwarten, ornamental horticulture junior and secretary of NOW, is one of those who will volunteer. She feels the "prayers" are misdirecting their beliefs, because many people who

go to the clinic are just going to the doctor for routine check-ups.

"I believe people have freedom to express their opinion, but I find it strange that they are attacking Planned Parenthood as a whole," Schwarten said. "They are causing hardships for people who are just going to the doctor."

Employees have also felt their presence. Story said they try to have minimum contact with the "prayers" because they do not know what they are capable of.

"There is always a possible

evaluations affect PSSI awards

By Britt Fekete
Daily Staff Writer

Speculation has surfaced that the current professor evaluation forms given to students at the end of the quarter may become standardized across campus to ensure that all faculty are being evaluated fairly and with the same criteria.

Student evaluations play a role in determining which professors will receive a Performance Salary Step Increase (PSSI)—the controversial system of merit pay raises used throughout the CSU system for the last three years. Applications for this year's PSSIs were due last Friday.

Currently, each department is in charge of making up its own questions for the scantron part of the professor evaluation. Professors may add their own questions to receive feedback specific to their courses.

According to Mike Suess, director of faculty affairs, three major components make up the general process of evaluating professors for retention, tenure, promotion and PSSI.

The first component of faculty

U.U. table honors condom month

By Nicole Belt
Daily Staff Writer

'Tis the season for love, and, in the spirit of National Condom Month, students can equip themselves with a plethora of prophylactics in the U.U. this week.

In honor of National Condom Day on Valentine's Day, Feb. 14, the sexuality team has declared this to be "Love Carefully" week. They will have a table in the U.U. where students can test their sexual IQ to score cupid condoms and dental dams.

The team will ask sexual trivia questions and host games such as guessing the number of con-

QUICK FACTS

• National Condom Day is on Valentine's Day, Feb. 14.

• The three most common STDs at Cal Poly are chlamydia, herpes and genital warts.

doms in a jar. The team will also distribute educational information, answer questions and demonstrate condom application on members of the fruit group which resemble the male anatomy.

"We will be handing out information about loving carefully all week, so students can get prepared for the big day," said Laura Solomon, microbiology senior and co-coordinator of the sexuality team.

Nationwide, the theme for the day is "Love Me Safely." According to the American Social Health Association, Valentine's Day is the perfect day to emphasize that loving someone means protecting the sexual health of both partners.

"Because STDs are so often symptomless, sex partners must talk to one another about any risk for STDs, even if neither person

has symptoms," said Linda Alexander, ASHA president. "We know it's a sensitive subject, but this is the only way to make sure that you both stay healthy."

If either partner has had unprotected sex at any time, ASHA recommends that both get tested for STDs and use condoms correctly every time they have sex. Condoms are essential unless both partners are 100 percent certain that they are free of infection.

Many Cal Poly students are aware of the risks of having unprotected sex and think condoms should be used to avoid possible repercussions.

"It's really important to communicate with your partner beforehand about using condoms," said Stan Scofield, industrial technology sophomore.

"So many people are so edu-

Panetta says he won't run for governor this year

By Catalina Ortiz
Associated Press

MONTEREY - Former White House Chief of Staff Leon Panetta announced Monday he will not enter the race this year for the Democratic nomination for governor of California.

Panetta said he had agreed to reconsider entering the race in the wake of U.S. Sen. Dianne Feinstein's decision two weeks ago not to seek the Democratic nomination.

However Panetta said at this late date it would have been extremely difficult to put together an effective campaign and he would have had to spend 90 percent of his time raising money.

He said he thought he could have raised between \$15 and \$20 million of the up to \$30 million the campaign might have cost.

"That is, quite frankly, not my idea of a campaign I'd like to run," Panetta said at a news conference. "My heart and soul would not be committed to having to raise the large amount of money necessary for this race."

Panetta's decision leaves Lt. Gov. Gray Davis and multimillionaire businessman Al Checchi as the only announced candidates for the Democratic nomination in the June 2 primary.

State Sen. John Vasconcellos of Santa Clara is also considering entering the race.

Attorney General Dan Lungren is the presumptive Republican nominee to succeed GOP Gov. Pete Wilson, who is barred by term limits from running again.

Candidates must file preliminary papers by Wednesday to enter the primary.

Feinstein, the front-runner in all polls on the governor's race and the only Democrat leading Lungren, withdrew despite the personal encouragement of President Clinton.

She said at the time the president's plea forced her to come to grips with the reasons for her reluctance to enter the race, which she identified as the enormous fundraising demands and the increasingly negative and mean-spirited tone of political campaigns.

Panetta said he didn't blame Feinstein for opting not to run, and that her choice didn't affect his decision.

Feinstein's late decision to withdraw may have created fund-raising problems for Panetta. Many observers believe potential Panetta supporters saw Feinstein as their party's best hope of recapturing the governor's office, and therefore were reluctant to back anyone else.

Panetta also was viewed as weakened by alleged White House fund-raising improprieties. While Panetta was never directly linked to any of the alleged improper activities, his name was on the distribution lists of many controversial memos and he was listed as a participant in many meetings which have been the target of inquiries.

He also was drawn into the most recent White House sex scandal.

Monica Lewinsky, the former White House intern linked to President Clinton, had worked for Panetta when he was chief of staff. Called before a grand jury in Washington last week, Panetta said he knew of no relationship between Clinton and Lewinsky.

On Monday, Panetta said the Lewinsky controversy did not affect his decision and that he'd decided not to run before the allegations surfaced.

"Obviously, the developments in Washington established another chance that I'd have to confront," Panetta said. "But to face them, you still need to have the resources."

Panetta, 59, served 16 years in Congress representing the Monterey Bay region of California, rising to chairman of the House Budget Committee, before Clinton tapped him to be Director of the Office of Management and Budget in his new administration.

Correction:

A news brief in Friday's Mustang Daily listed the incorrect time and place for the National Girls and Women in Sports Day. The event will take place Saturday, Feb. 28 from 10 a.m. to 2 p.m. at the field behind Mott Gym.

There's a certain joy that comes with seeing your name in print. Mustang Daily wants you to experience that feeling.

We are holding a freelance informational workshop Tuesday, Feb. 3. Anyone interested in reporting for Mustang Daily is welcome to attend. Whether you're interested in features on exciting places and interesting people or hard-hitting campus and community news, we have a story for you.

The freelance meeting starts at 7:30 p.m. Tuesday in building 26, room 226. For more information, call 756-1796.

Weather fanatics keep their eyes on the sky

By Michael Dougan
San Francisco Examiner

SAN FRANCISCO — On Dec. 1, 1951, a tempest of biblical proportions raged over San Francisco, forcing the first-ever closure of the Golden Gate Bridge.

At the apex of the squall, a child was born to the Heden family. His parents called him Craig. And he would love storms for the rest of his life.

"The weather and meteorology have been a little bit more than just a passionate interest," said Heden, now an electrical engineer living in Pacifica. "It's been a pas-

sion that's become an obsession."

A recent call to the Heden home was answered by his wife, Dody Heden. "Why don't you hang on for a second and let me get him down off the roof," she said. "He's fixing his weather station."

Heden is not alone in his preoccupation with matters meteorological. Others, often to the bemusement of their neighbors, keep weather gadgets in their back yards, faithfully record daily temperatures and precipitation levels, and find the best television

Storm moves into Southern California

Associated Press

OXNARD, Calif. — Southern California residents braced for a Pacific storm that began Sunday with light rains and was expected to pour several inches of rain by the time it moved out of the area.

"We expect heavy precipitation and gusty winds. This appears to be the major storm of winter," said National Weather Service meteorologist Gary Ryan.

By Sunday evening, the heaviest rainfall reported was 1.5

inches at Hearst Castle in San Luis Obispo County, he said.

"This stuff is moving in our direction," said Ryan from the NWS Oxnard office.

The brunt of the storm was expected to hit most areas Monday, continuing through Tuesday and ending by Wednesday.

Three to five inches of rain were expected along the coast, while rainfall totals in the mountain areas were expected to reach six to 10 inches, Ryan said.

Columnist should drink more beer

Editor,

What Jeffery had to say was okay (Arts Weekly, Jan. 29) but his opinion is his opinion. What makes him think that at the age of 21 he is a beer connoisseur? Because he has tasted a couple beers doesn't give him the right to be a critic. I bet that if I gave him a bottle of Coors Light and a bottle of Bud Light he wouldn't be able to tell the difference. I don't think this guy should knock us true partiers for thinking quantity and not quality—there are appropriate times for both. Because this guy obviously couldn't throw a fun party, let alone afford a keg of Anchor Steam, I think he should attend a 35F party and see what a keg of Nattie light can do, and then write his article. That's just my opinion on Jeffery Brooks' column.

Tony Freccero is a business administration sophomore.

Mythical pay raises at Cal Poly

Editor,

While it is nice to again see the faculty salary gap brought into the open (Mustang Daily Jan. 29, 1998), it is a shame that your paper continues the MYTH about what happened last year. In fact, even President Baker claims we received a 4.1 percent raise. Nothing could be further from the truth.

This number is based on the overall dollar pool for salaries being increased by 4.1 percent. This IS true, but that does not mean we all received a 4.1 percent raise, in fact, it's quite the opposite.

The FACT is that roughly 85 percent of the faculty received only 2.1 percent raise. The remaining 15 percent faculty

were PSSI winners and a big chunk of the "raise pool" went to them, for an average of over 10 percent. So for them, the so-called gap is closed.

The MEDIAN faculty person's salary, however, only went up 2.1 percent, not 4.1 percent. In this case the average is a statistically meaningless concept. In fact, the use of the average by the administration just goes to show the disdain they have for the faculty and CFA.

This also serves to point out yet one more inequity in the PSSI program. It should be done away with and all previous awards negated since it does nothing more than suck raise money away from the faculty as a whole.

To summarize, the typical faculty person gained 2.1 percent in salary last year, barely enough to keep up with inflation, thus maintaining the gap at about 11 percent. The faculty who won PSSI's (an overwhelming fraction of which do less than full-time teaching and concentrate on winning research grant money) got a huge raise, enough to close their gap. Therefore they should receive no raises this year.

Thank you for the opportunity to clear up this lie/myth.

A. J. Buffa is a physics professor.

Rub your tummy and enjoy good scandal

Editor,

Prompted by Amelia Ramos' article in Thursday's Mustang Daily titled "Adultery Isn't a Crime," I would like to help clear up some misconceptions many like her may have in regard to the notion of "separation of church and state."

Many Americans without properly researching their history believe that there is something in the Constitution which prohibits any establishment of government from practicing or promoting biblical based values and teachings. The fact is, this nation was founded upon Christian principles and was never intended to be governed without them. I believe this has contributed a great deal to the fact that America has managed to avoid the fate befallen to Communist Russia — a nation without God.

I would hate to bring any more attention to a good scandal than is deserved (everyone knows we've been cheated out of enough newsworthy events as it is), but if

we're tired of hearing about this because a man's sex life should be his own business, then I'm afraid we're tired of it for the wrong reason altogether.

I am very disappointed when the Constitution like the Bible is twisted and used out of context to justify an individual's perspective and even worse to excuse immorality. The framers of the Constitution never intended for the complete moral and spiritual separation from government that we are witnessing today. Since the very beginning, America has been a nation governed by the Judeo-Christian ethic. The notion of "separation of church and state" as it exists today was a relatively new INTERPRETATION of the First Amendment to the Constitution as decided by the Supreme Court in (Engel v. Vitale 1962).

The First Amendment reads: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

From the historical context, it is readily apparent that the original intent of any sep-

aration whatsoever was to be from a strictly legal standpoint, not a moral or spiritual one.

The amendment was instituted for the primary purpose of preventing the State from making any law instituting an official religion or preventing another religion or denomination from establishing itself. There is no justifiable reason under the constitution why the principles of Christianity can not pervade the governance of this nation as it has for more than two centuries. By the way, the court has interpreted this "separation," we should also be censoring and changing our most basic laws (Thou shall not steal, murder, etc.). As we slowly push morality out of government, we are left with lawlessness as evidenced more and more by the actions of corrupt leaders and politicians.

Whose name appears on our currency anyway? Does it read, "In the president we trust?" Does it say, "In the economy we trust?" I'm sorry Amelia that you would feel "unsatisfied" with a president like Jesus.

The truth is, most of us would feel more comfortable with a leader who is more like us. We feel better about ourselves when the president is struggling with his moral compass. It sort of lets us off the hook. And no, of course not, why should it matter if the president is ripping his family apart due to his promiscuousness, so long as the economy's good and there's food in my stomach. We like our president don't we!

The state of this nation's moral relativistic attitude that feels it's not our business to make judgments, is becoming dangerously tolerant. Can you imagine if Abraham Lincoln had said to the South, "Hey if slavery's your thing, that's cool! Do what ya wanna do, ain't my business. It's time for Americans to step up and expect more from themselves and their leaders."

Ryan Belong is a graphic design senior who used to be proud to be an American.

We are now recruiting for Sales Trainees/Sales Representatives.
Sign up for an interview at the Career Center

Website: <http://www.stdreg.com/>

Few companies can match Standard Register's profile. We're proud to be an acknowledged leader in information processing products, with annual revenues of \$1 billion plus and a track record of innovation for more than 85 years.

Sales Trainees/Sales Representatives

You will assist clients with document automation, workflow engineering and information processing. To qualify, you'll have a Bachelor's degree, 0-3 years' sales experience and the motivation and drive to succeed. The Sales Trainee is a 6-12 month position which will lead directly into a Sales Representative position.

Recruiting for the following locations:

Los Angeles, Pasadena, Van Nuys, Costa Mesa, San Diego, San Francisco, Oakland, Santa Clara, Sacramento, Portland and Seattle. Other U.S. locations available.

We offer:

Unlimited earning potential
Salary plus commission (Sales Rep.)
Salary (Sales Trainee)
Excellent training program
Management career path.

Standard Register will conduct an information session on Monday, Feb. 9 from 6pm-8pm in Staff Dining Room A and interviews all day on Tuesday, Feb. 10. If you are unable to attend the information session and/or interview but are interested in opportunities with Standard Register, please send/fax your resume and a cover letter indicating locations which interest you to: Sales Opportunities • The Standard Register Co. / Attn: Kristel Svansjo • Human Resources Rep. / 55 Hawthorne St. Ste 910 • San Francisco, CA 94105 / Fax 415-547-1844

Technology You Can Sink Your Teeth Into.

At Advanced C³I Systems (AC³I), you can sink your teeth into the meat of our technical capabilities—
software engineering—

immersing yourself in Java™, 3D, Web Technology, Client/Server and Data Fusion. You'll understand the exuberance we feel when you see the exciting, entrepreneurial projects we feed on. Formerly Tiburon Systems, AC³I will give you the chance to work in a small company environment, backed by resources of a top-tier defense contractor. Bite off as much as you can chew—at AC³I.

ASSOCIATE SOFTWARE ENGINEER

The qualified candidate will be responsible for all levels of design, code, test and integration of complex client/server software systems. Application areas include Graphical User Interface, decision aids, database and communications. A BSCS or equivalent and 1+ years of software development experience are required. Experience with UNIX, Windows, NT, Java and Ada programming is preferred.

Make sure you stop by our info session at the Staff Dining Complex (Building 19), Room C on Wednesday, February 4th from 6:30-8:30p.m.

Please send your résumé to: Raytheon, 1290 Parkmoor Ave., San Jose, CA 95126. FAX: 408-293-0351. E-mail: jobs@ti.com Travel opportunities exist both domestically and overseas with most positions. CONDOM from page 1

cated on the subject of sex, it seems like they would make the right decision. Condoms are essential because even if you're on the pill, you're not protected against disease," said Sherri Shieh, computer science sophomore.

"Everyone is aware of how important condoms are and the consequences that will arise if you don't use them. Still, there are moments when a condom crosses the mind and people choose not to listen," said Antonio Martinez, business senior.

"If you're not in a monogamous relationship and don't know where your partner has been, it's really important to use condoms," said Hillary Clay, biochemistry junior.

It is estimated that there are 12 million new STD cases in the U.S. annually, with two-thirds afflicting people under 25 and one-fourth occurring among teenagers.

The three most common STDs at Cal Poly are chlamydia, herpes, and genital human papillomavirus (HPV)—otherwise known as genital warts.

Condoms are considered to be

highly effective in protecting against chlamydia, gonorrhea and syphilis. They are less reliable in preventing transmission of genital herpes and HPV, because the site of infection may lie outside the condom.

The Center for Disease Control and Prevention recommends condom use for STD protection based on studies conducted among couples in which one partner was infected with HIV/AIDS. Between 89 and 100 percent of the couples avoided transmitting the disease by using condoms consistently and correctly.

The male latex condom is considered to be the most effective in preventing STDs, followed by the female condom. Natural membrane condoms are not recommended for disease prevention.

In observance of the holiday, Planned Parenthood has condom roses available for that special someone, in traditional Valentine colors for \$4. They serve the dual purpose of allowing people to protect themselves and their sweethearts, and are the gift that keeps on giving this Valentine's season.

threat of violence. We don't know who these people are, but they don't seem rational," she said.

The Planned Parenthood clinic moved to Pismo Street three years ago when the original Santa Rosa Street clinic burned down in an arson fire. The clinic chose the new location on Pismo Street, which was conveniently across from the fire department.

Since the fire, the "prayers" are the first demonstrators the clinic has had.

Story said the demonstrators ironically came as soon as the fire department moved from Pismo Street a year ago but doesn't see any correlation between this group and the arson incident.

According to Welsh, the people who burned the clinic and the ones who bombed the abortion clinic in Alabama last week are not "true pro-lifers." She said that to think pro-lifers would harm people is an "upside-down" way of looking at things.

"If we wouldn't kill a baby, why would we kill another person?" she asked.

Planned Parenthood has become the group's target because it performs abortions. One of the "prayers" goals is to get patients to go to other places for their doctors visits.

"There are other places that people can go to get a pelvic exam, where no killing of innocent babies is done," Welsh said.

The group believes all methods of contraception are wrong because they prevent creation from happening and take away God-given lives. They feel that the morning-after pill and some other

types of oral contraceptives are methods of early abortions.

The group is also concerned with the side effects of abortion. One of the pamphlets the group hands out lists 17 physical side effects and 20 emotional side effects brought on by abortions including sterility, future miscarriages, breast cancer, alcoholism and inability to forget the baby's due date.

The group's ultimate goal is to see that abortions will cease totally and clinics like Planned Parenthood will no longer exist.

"The recent controversy over partial birth abortions is raising people's awareness and changing people's hearts all over the U.S. toward abortions," Welsh said.

Many people receive the group with something less than a warm heart. Welsh said they have been cursed at and given "the finger" by Planned Parenthood customers.

Story has become frustrated that these demonstrations have taken so much time away from her work as she has had to constantly monitor the situation outside for a year.

The group has been meeting regularly for a few hours on Tuesday and Friday mornings, and Welsh said they will continue to pray until, across America, people's hearts change. They say they would like to have someone out in front of the clinic every day, but right now they are short of people. Welsh said there were a lot of Cal Poly students praying with them but now they can't because school is in session.

EVAL from page 1

evaluation is based on teaching effectiveness. Effectiveness is measured by evaluations of the instructor by faculty in the department, an evaluation by the department chair and student evaluations.

The second component is based on professional growth of the instructor. This includes attending professional meetings and having scholarly work published. A professor's contributions to the department, university and community are also looked at.

Sherry Couture, political science department administrative assistant, said she's heard something about creating a standardized evaluation instrument as a basis for faculty equality.

Suess said he doesn't know of any major movement to get a campus-wide evaluation form implemented. He said if one was established, the main intent would be to make it easier to compare evaluation results between departments.

One possible source of a standardized form would be a company-produced form sent to the university. The questions would have been validated by an external source and considered to be reliable in measuring an instructor's evaluation.

As defined in the Campus Administration Manual, the guidelines for student evaluation of faculty have existed as a regular part of Cal Poly's personnel procedures since 1974. These guidelines must be followed by each department in the university when administering evaluations.

PROFESSORS ON EVALUATIONS

Differing opinions about the importance and use of student evaluations as well as the fairness of PSSI exist across campus.

Michael Yoshimura, biological sciences professor, said he doesn't agree with giving PSSI to faculty at all because it's an unfair system.

"From the start it's wrong because there isn't enough money to give all the professors PSSI. There aren't enough awards for all deserving faculty. That develops into the have and have-nots," he said.

When the money is given to the CSU system by the state legislature, a portion is allotted for PSSI programs at all CSU campuses. Yoshimura said this is where his problem begins. He said that the public hears that faculty's salaries have gone up some percentage and statistically it's true—money has been given to the university to increase faculty salaries—but not everyone who applies for a PSSI receives one.

Biological Sciences Department Chair V.L. Holland said student evaluations are a critical and necessary part of determining a professor's teaching performance.

"In general, there seems to be a direct correlation between student evaluations and faculty members' effectiveness in the classroom. However, there are always exceptions," Holland said. "I am a strong believer in student evaluations. Students provide an excellent measuring stick for how professors are performing. Professors who have outstanding student evaluations are going to be evaluated as excellent teachers by their colleagues as well."

Holland said he reads all of the evaluations every quarter and if he sees a problem with a professor he will go over the results with that professor. All faculty are welcome at any time to come into his office if they have questions regarding the evaluations.

He added that his department is happy, for the most part, with the way student evaluations are conducted.

Ethnic studies professor Philip Yang said he uses the evaluations to determine which aspects of a course he should improve and which should stay the same.

"I found that most student evaluations are helpful to assess the performance of the instructor and of the course, and whether or not the students understand the material," he said.

Yang added that overall patterns in student evaluations should be examined, as opposed to using just one student's answers to effectively determine faculty performance.

English professor Michael Orth said that, although students tend to be too charitable on the evaluations, he goes to a lot of trouble to get student input. He said he asks his own questions and has his students give him an overall letter grade.

Orth said from what he's seen, poor professors get the same grades as the better professors. He added that, because the evaluations are the only quantitative method of evaluation, they get a lot of weight.

"Just because the number is precise doesn't mean it's measuring anything exact," he said.

Orth said his simple solution would be to have students give faculty a letter grade for the course. This would eliminate what he sees as students being generous when

evaluating.

Yoshimura said the way evaluations are done now, not everyone evaluates with the same critical process, and therefore the entire procedure seems arbitrary. He said the process would be more fair if there was a raise across the board for all faculty.

STUDENTS ON EVALUATIONS

History senior Dayna Sciochetti said she feels her voice isn't being heard, which frustrates her because the administration keeps teachers who she thinks shouldn't be teaching. She said the negative comments she wrote about a political science instructor last year were not because she received a bad grade in the class, but because she hoped her opinion, as his student, would help him improve his methods of teaching.

"I look at what the professor brings into the classroom. This professor did not answer students' questions. He was very rude when a student didn't understand something, and was almost demoralizing to students when they wanted an explanation on what he thought he had explained already," she said. "I'm not paying for my time to be wasted, and that's what I feel this class did."

Sciochetti also said she knows a professor's whole career can't be based on student evaluations, but a

Cal Poly's teacher evaluation guidelines

- The primary purpose of the evaluations is to assist in improving the effectiveness and quality of teaching.
- Students should evaluate factors including course organization, quality of presentation, grading procedures and exams.
- At least once a year, every instructor shall distribute evaluations in each class he/she teaches.
- Only officially enrolled students may participate in the evaluation process.
- Results will be used to improve teaching and to assist in determining promotions, tenure and retention of faculty.
- After grades have been finalized, results will be given to the professor being evaluated and their department head.
- Each of the schools may use their own evaluation form. A department may also develop its own evaluation form.
- Each department is responsible for furnishing its faculty with copies of the guidelines and instructions to insure evaluations are administered properly.
- No more than 25 minutes will be allowed in each class for completing the evaluation, and the professor must be absent from the classroom during this time.

change in the current system needs to be made with ways of assuring that student education becomes top priority. She said she's also had some wonderful teachers and has acknowledged that on their evaluations as well.

Sciochetti said while she feels a standardized evaluation form may be more fair, she wants to know if students' opinions will be looked at seriously.

Biochemistry sophomore Aimee Bodan said she agrees student comments should be looked at closer by the professors themselves so they can alter and improve their teaching if necessary.

"I think some professors care about the evaluations and some don't. You can tell which ones do care because they tell the class that the evaluations are important to them," she said.

drama on the Weather Channel.

A local TV weatherman warmly calls them "weather nuts." On the Weather Channel, they're known as "met-heads" ("met" for meteorology).

Susan Foxall of Davis Weather Instruments knows them well. Her Hayward firm sells primarily to amateur enthusiasts.

"We have more than 100,000 weather stations installed worldwide," she said. Foxall described Davis customers as ranging from "kids in high school who are budding meteorologists to 80-year-old men who are retired who have always been interested in weather."

Many find their fascination at an early age, and some turn pro.

"That's the way I started," said John Monteverdi, an San Francisco State University professor of meteorology who journeys each summer to Oklahoma to chase tornadoes. "I had a backyard Lionel weather station at my parents' house with a rain gauge, a thermometer and a wind vane. I had many years worth of consecutive records that I contributed to the weather bureau."

Clinton unveils balanced budget, GOP sees big-government rerun

By Alan Fram
Associated Press

WASHINGTON - Proclaiming an era of fat federal surpluses, President Clinton unveiled a \$1.73 trillion budget Monday claiming the first surpluses in 30 years and pumping billions to schools, health and child care. Republicans saw a big government revival, and House Speaker Newt Gingrich scoffed, "This is a budget only a liberal could love."

Clinton's fiscal 1999 proposal plays political offense and defense simultaneously, thanks to huge windfalls from a possible tobacco settlement and from a surging economy that has generated soaring federal revenues.

The president would please Democrats by pouring money into a wide sweep of initiatives, including hiring teachers, boosting scientific research and expanding welfare. He would cater to Republicans by producing a \$9.5 billion surplus next year and \$1.1

trillion in black ink through the decade. But he again warned them to leave that money alone while a solution to the long-term fiscal ills facing Social Security is found.

"You can have a smaller government but a more progressive one that gives you a stronger America," Clinton said at a White House ceremony.

GOP leaders were buying none of that. They complained that the president was unleashing tens of billions in new programs over the next five years, producing a balanced budget but also a bigger one than necessary. They promised to come up with a leaner plan of their own that emphasized tax cuts, not new spending.

"Looking at this budget, the era of big government is back," House Budget Committee Chairman John Kasich, R-Ohio, said of Clinton's proposal.

"This is going to be a classic debate," said Sen. Pete Domenici, R-N.M., chairman of the Senate Budget Committee. "Do we want

more government or less? Do we want to give the people of the United States a tax break?"

The Republican remarks signaled that despite the truce over cutting deficits that last summer's budget pact produced, this congressional election year will feature partisan battling over how to shape government in a time of prosperity. Clinton's blueprint is a proposal only, and many of its initiatives are sure to be dropped or changed by the Republican majorities in the House and Senate.

Indeed, the Clinton plan for the fiscal year that begins Oct. 1 left several crucial questions unanswered or vague.

It does not spell out the precise price tag for Clinton's new domestic initiatives, which number in the scores. Administration officials estimated annual costs of his chief spending increases and tax cuts at \$12 billion to \$20 billion annually, while Domenici said Clinton was proposing \$150 billion in new items over five years.

STORM from page 3

Residents throughout Southern California heeded warnings to prepare for the storm by lining up sand bags outside their home.

"Hopefully, all this El Nino hype has gotten people to where they need to be, such as fixing roofs and those types of things," Ryan said. "If they haven't started that by now, well, they're a little late. But they're going to have to do things like leave a little bit earlier for their destinations."

Along the coast Sunday, people watched as swells, some as high as 20 feet, pounded the area. High surf was expected to continue Monday.

Lt. Bill Humphreys, of the San Clemente Marine Safety Division said the pier was closed Sunday due to waves ranging from 10 to 15 feet tall.

While the expected El Nino storms have so far failed to materialize, sea lions in Laguna Beach were affected by warmer seawater. Volunteers at Friends of the Sea Lion Marine Mammal Center on Saturday rescued 63 malnourished mammals, compared to only about a handful on the same date last year.

Mustangs drop two league games

Daily Staff Report

Inside the gym and out of the rain a record crowd of 720 fans cheered on the Cal Poly women's basketball team Sunday.

Trailing by as many as 17 points in the second half, Cal Poly fought to come back into the game, but eventually fell to Cal State Fullerton, 72-64.

The Titans led 37-26 at halftime, and then expanded their lead by 16 points, 53-36.

The Mustangs mounted a comeback with thirteen minutes left to go in the game. Twice they narrowed the point spread within six.

Jackie Maristela nailed a jumper to cut Cal State Fullerton's lead to 70-64 with just 17 seconds remaining.

Cal Poly was forced to foul at that point. The Titans twice hit one of two free-throws. The Mustangs could not answer back.

Heather Lee came off the bench to score a career high 12 points, the first time she has scored in double figures, to lead the Mustangs in the scoring column. She hit five-of-seven shots (71.4 percent) from the floor.

Stephanie Osorio added 11 points, nailing three 3-point shots in the process, hauled in five rebounds and had five steals.

Lauren Andrade scored a season high 11 points on the strength of three-for-three shooting from the rim.

Maristela led the Mustangs in rebounding with six. While Cal Poly's defense forced the Titans into 30 turnovers.

Cal State Fullerton Niesha Cleveland led all scorers with 15 points. Kris Sigg added 14 points and Nashira Shaw also hit twin figures with 11. The Titans' Erin Whiteside grabbed a team-high 16 rebounds.

On Friday night the Mustangs struggled again to come out ahead of U.C. Irvine, another Big West Conference opponent.

This time Cal Poly took control of the lead early at 23-14. But U.C. Irvine rallied back to tie the score at 31 by halftime.

The Mustangs came out of the locker room after halftime ready to capture another Big West win.

Cal Poly fell behind 54-44 early in the second half, but pulled to within 54-51 with nine minutes to go on a seven-point run.

A 17-3 U.C. Irvine run gave Anteaters a 16-point lead with five minutes remaining, and all but ended Cal Poly's chance of pulling off the upset.

U.C. Irvine defeated Cal Poly, 81-64.

Anteaters forward Leticia Oseguera scored a career-high 14 rebounds to lead her team. Chelsea Mackey scored 18 points and grabbed nine rebounds. Megan Stafford added 12 points, seven assists and six rebounds.

The night still shined for one Mustang. Osorio led the Mustangs with 15 points, hitting three 3-pointers in the process. She opened the game with a three-pointer just 56 seconds into the contest, the 100th three-pointer of her career. She now has 102 three-pointers in just over a year and a half.

Also in double figures for Cal Poly was center Ava Garrett, who scored 10 points.

Sherilyn Frazier grabbed the most rebounds for the Mustangs, bringing in five.

With these two losses, Cal Poly drops to 5-14 overall and 2-6 in the Big West.

The Mustangs travel south this weekend to take on Big West Conference opponents, Long Beach State and University of the Pacific.

Senior forward Rona Bevien added eight points and grabbed four rebounds in the Mustangs' game versus U.C. Irvine. Against Cal State Fullerton, Bevien added another seven points and took another five balls down off the boards.

Daily photo by Jason Kallenbach

CLUB CORNER

Mustangs trounce Toreros

Daily photo by Jason Kallenbach

The Cal Poly Rugby club team didn't lose to the University of San Diego on Saturday. Both sides conquered the Toreros two times over. The first side trounced San Diego 110-12, contrary to the score reported yesterday. And then the second side, Cal Poly beat the Toreros 24-19. Above, inside center agricultural engineering senior Pat Beatty rips away down field.

Men's volleyball club team notched
more marks in the win column
weekend. The Mustang team beat
Santa Clara Friday (15-1, 15-2, 15-5).
The junior varsity team defeated University of
San Francisco on Saturday (15-1, 15-10, 15-7).

Daily photo by Jason Kallenbach
